CONTENTS TO VOLUME 37 and 38

CONTENTS Vol. 37, No. 1

1 Thermal Radiation in a Discretely Heated Irregular Geometry Using the Monte-Carlo, Finite Volume, and Modified Discrete Ordinates Interpolation Method **Do Young Byun, Seung Wook Baek, and Man Young Kim**

19 Effect of Radiative Transfer on the Thermophoretic Particle Deposition Around a Circular Cylinder in a Uniform Cross Flow **Kong Hoon Lee, Mansoo Choi, and Joon Sik Lee**

37 Numerical Investigation of Convective Heat Transfer and Pressure Drop in Wavy Ducts **H. Blomerius and N. K. Mitra**

55 Numerical Study on the Limiting Characteristics of an Open-Type Water-Cooled Flat-Plate Solar Collector **B. Song, H. Inaba, and A. Horibe**

69 Numerical Simulation of the Effects of Buoyancy Forces and Flow Control Devices on Fluid Flow and Heat Transfer Phenomena of Liquid Steel in a Tundish **S. Lopez-Ramirez, R. D. Morales, and J. A. Romero Serrano**

87 Rewetting of an Infinite Slab with Boundary Heat Flux **A. K. Satapathy and P. K. Kar**

CONTENTS Vol. 37, No. 2

101 Evaluation of Laminar-Turbulent Transition and Equilibrium Near Wall Turbulence Models **Xiong He, Inanc Senocak, Wei Shyy, Sathya N. Gangadharan, and Siddharth Thakur**

113 Numerical Simulation of Chemical Vapor Deposition Processes Under Variable and Constant Property Approximations **Wilson K. S. Chiu, Yogesh Jaluria, and Nick G. Glumac**

133 Effects of Thermocapillary Convection on Melting Within Droplets **J. M. Khodadadi and Y. Zhang**

155 Congugate Numerical Model for Cooling a Fluid Flowing Through a Spiral Coil Immersed in a Chilled Water Container **A. Nakayama, N. Kokubo, T. Ishida, and F. Kuwahara**

167 Simulation of Erosion by the Dilute Particulate Flow Impact **Yang-Yao Niu and Chih-Shung Tsai**

189 Simulation of Swirling Turbulent Flows of Coaxial Jets in a Combustor **Yong Lei, Jian Zhang, and Lixing Zhou**

CONTENTS Vol. 37, No. 3

201 Simulation of Metal Droplet Deposition with Solidification Including Undercooling and Contact Resistance Effects **M. Chung and R. H. Rangel**

227 Numerical Simulation of Tubular Blown Film Processing **J. P. Pontaza and J. N. Reddy**

249 The Effects of Radiation on Natural Convection in a Rectangular Enclosure Divided by Two Partitions **Cho Young Han and Seung Wook Baek**

271 Forced Convection in Micropolar Fluid Flow Over a Wavy Surface **Ching-Yang Cheng and Chi-Chang Wang**

289 Turbulent Flow and Heat Transfer in a Channel with a Square Bar Detached from the Wall **Alvaro Valencia**

307 Heat Transfer Characteristics of Flow Past a Rectangular Protruding Body **S. Z. Shuja, B. S. Yilbas, and M. O. Iqbal**

CONTENTS Vol. 37, No. 4

323 Direct Numerical Simulation of Layer Merging in a Salt-Stratified System **T. Nishimura, K. Kunitsugu and Al. M. Morega**

343 The Effective Thermal Conductivity of Packed Beds of Spheres for a Finite Contact Area **G. Buonanno and A. Carotenuto**

359 Numerical Calculations for Combined Conduction and Radiation Transient Heat Transfer in a Semitransparent Medium **Ido Anteby, Isaac Shai, and Abir Arbel**

373 Numerical Simulation of Laminar Forced Convection in an Air-Cooled Horizontal Printed Circuit Board Assembly **C. W. Leung, S. Chen, and T. L. Chan**

395 Numerical Simulation of Natural Convection with Density Inversion in a Square Cavity **Masaaki Ishikawa, Tetsuo Hirata, and Shigeho Noda**

407 Characteristics of Three-Dimensional Flow, Heat, and Mass Transfer in a Chemical Vapor Deposition Reactor **Kyoung-Woo Park and Hi-Yong Pak**

CONTENTS Vol. 37, No. 5

425 Numerical Simulation of Resistance Spot Welding Process **Jamil A. Khan, Lijun Xu, Yuh-Jin Chao, and Kirkland Broach**

447 Large Eddy Simulation of Natural and Mixed Convection Airflow Indoors with Two Simple Filtered Dynamic Subgrid Scale Models **Wei Zhang and Qingyan Chen**

465 The Estimation of Fluid Temperatures Through an Inverse Heat Conduction Technique **R. S. Banim, M. J. Tierney, and P. N. Brett**

477 Computation of Radiative Properties in One-Dimensional Sphere Packings for Sintering Applications **A. K. C. Wu and S. H.-K. Lee**

493 A Study of Free Convection Induced by a Vertical Wavy Surface with Heat Flux in a Porous Enclosure **B. V. Rathish Kumar**

511 Forced Convection Laminar Film Condensation of Downward Flowing Vapor on a Single Horizontal Elliptic Cylinder or a Bank of Elliptical Tubes **M. Asbik, D. Ould Hadda, A. Il Idrissi, B. Zeghmati, and A. Khmou**

CONTENTS Vol. 37, No. 6

545 Natural Convection in Trapezoidal Cavities with Baffles Mounted on the Upper Inclined Surfaces **F. Moukalled and S. Acharya**

567 Predictions of Developing Flow with Buoyancy-Assisted Flow Separation in a Vertical Rectangular Duct: Parabolic Model Versus Elliptic Model **Chin-Hsiang Cheng, Chin-Yung Lin, and Win Aung**

587 Resolution of a Three-Dimensional Unsteady Inverse Problem by Sequential Method Using Parameter Reduction and Infrared Thermography Measurements **D. Nortershauser and P. Millan**

613 An Optimum Spacing Problem for Three Chips Mounted on a Vertical Substrate in an Enclosure **Yang Liu and Nhan Phan-Thien**

631 Sphere Packing Algorithm for Heat Transfer Studies **A. K. C. Wu and S. H.-K. Lee**

653 Heat Transfer Enhancement by Multilobe Vortex Generators: Effects of Lobe Parameters **Yeng-Yung Tsui, Shiann-Woei Leu, Chih-Chang Lin, and Po-Wenn Wu**

CONTENTS Vol. 37, No. 7

673 Modeling the Effect of EGR and Multiple Injection Schemes on I. C. Engine Component Temperatures **James F. Wiedenhoefer and Rolf D. Reitz**

695 Mixed Convection in Cavities with a Locally Heated Lower Wall and Moving Sidewalls **Orhan Aydin and Wen-Jei Yang**

711 Analysis of Conjugate Heat Transfer In Microchannel Heat Sinks **Kiran K. Ambatipudi and Muhammad M. Rahman**

733 Enhancement of Heat Transfer in Turbulent Separated and Reattaching Flow by Local Forcing **Gwang Hoon Rhee and Hyung Jin Sung**

755 Numerical Study of Unsteady 2D Natural Convection and Solidification of a Food Inside a Freezing Chamber **Nelson O. Moraga and Carlos H. Salinas**

779 Two-Dimensional Transient Natural Convection in a Repetitive Geometry Submitted to Variable Heating from Below: Numerical Identification of Routes Leading to Chaos **S. Douamna, M. Hasnaoui, and B. Abourida**

CONTENTS Vol. 37, No. 8

801 A Full 3-Dimensional Adaptive Finite Volume Scheme for Transport and Phase-Change Processes, Part I: Formulation and Validation **A. Chatterjee and V. Prasad**

823 A Full 3-Dimensional Adaptive Finite Volume Scheme for Transport and Phase-Change Processes, Part II: Application to Crystal Growth **A. Chatterjee, V. Prasad, and D. Sun**

845 Characterization of Space Dependent Thermal Conductivity with a BEM-Based Genetic Algorithm **Eduardo Divo, Alain Kassab, and Franklin Rodriguez**

877 Finite Frequency External Modulation in Doubly Diffusive Convection **O. Sovran, G. Bardan, A. Mojatbi, and M.-C. Charrier-Mojtabi**

897 Numerical Simulation of Nonisothermal Flow of Polymer Melt in a Single-Screw Extruder: A Validation Study **Seppo Syrjälä**

917 Effects of Thermal Boundary Condition on Buoyancy Driven Transitional Air Flow in a Vertical Cylinder Heated from Below **T. C. Cheng, Y. H. Li, and T. F. Lin**

Following page 936:

Title Page to Volume 37
Author/Subject Indices to Volume 37
Annual Table of Contents to Volume 38

CONTENTS Vol. 38, No. 1

1 Use of Slots to Enhance Forced Convective Cooling Between Channels with Surface-Mounted Heat Sources **S. H. Kim and N. K. Anand**

3 Solving a Thermal Regenerator Model Using Implicit Newton–Krylov Methods **J. W. Howse, G. A. Hansen, D. J. Cagliostro, and K. R. Muske**

45 Numerical Modeling of Conjugate Heat Transfer During Impingement of Free Liquid Jet Issuing From a Slot Nozzle **Antonio J. Bula, Muhammad M. Rahman, and John E. Leland**

67 Numerical Simulation of Turbulent Convective Heat Transfer in Square Ribbed Ducts **Arash Saidi and Bengt Sundén**

89 Transient Natural Convection Inside Porous Cavities: Hybrid Numerical-Analytical Solution and Mixed Symbolic-Numerical Computation **L. S. de B. Alves and R. M. Cotta**

CONTENTS Vol. 38, No. 2

111 Numerical Prediction of Temperature Distribution in PEM Fuel Cells **S. Shimpalee and S. Dutta**

129 Simulation of Rapid Thermal Processing in a Distributed Computing Environment **J. Liu and Y. S. Chen**

153 Effects of Rarefaction and Compressibility of Gaseous Flow in Microchannel Using DSMC **Hongwei Sun and Mohammad Faghri**

169 Wave Propagation in Two-Phase Flow Based on a New Hyperbolic Two-Fluid Model **Moon-Sun Chung, Keun-Shik Chang, and Sung-Jae Lee**

193 Melting of a Pure Metal on a Vertical Wall: Numerical Simulation **Fulvio Stella and Marilena Giangi**

209 Numerical Prediction of Laminar Forced Convection in Triangular Ducts with Unstructured Triangular Grid Method **W. Leung**

CONTENTS Vol. 38, No. 3

225 Numerical Modeling of Helical Flow of Pseudoplastic Fluids **Q. E. Hussain and M. A. R. Sharif**

243 A Domain Decomposition Method for Solving Three-Dimensional Heat Transport Equations in a Double-Layered Thin Film with Microscale Thickness **W. Dai and R. Nassar**

257 The Influence of Moisture on the Combustion of Wood **R. Yuen, G. de Vahl Davis, E. Leonardi, and G. H. Yeoh**

281 A Numerical Study of Instantaneous Heat Transfer During Compression and Expansion in Piston-Cylinder Geometry **A. G. Catto and A. T. Prata**

305 Streamline Upwind Pertov–Galerkin Finite Element Analysis of Thermal Effects on Load Carrying Capacity in Slider Bearings **B. V. Rathish Kumar, P. Srinivasa Rao, and P. Sinha**

CONTENTS Vol. 38, No. 4

325 An Advanced Spray Model for Application to the Prediction of Gas Turbine Combustor Flow Fields **Anil K. Tolpadi, Suresh K. Aggarwal and Hukam C. Mongia**

341 Effects of Thermal Radiation on the Sound Wave Propagation in a Gas-Particle Two-Phase Medium **Jae Hyun Park and Seung Wook Baek**

357 Numerical Study on Cooling Phenomenon of Water with Supercooled Region in a Horizontal Circular Cylinder **Jung In Yoon, Oh Kyung Kwon, Choon Geun Moon, Young Seok Son, Jae Dol Kim and Toyofumi Kato**

377 Very Weak Fountains in a Homogeneous Fluid **Wenxian Lin and S. W. Armfield**

397 Numerical Predictions of Flow and Thermal Fields in a Reciprocating Piston-Cylinder Assembly **Chin-Hsiang Cheng and Kuo-Shu Hung**

423 Laser Short Pulse Heating with Convective Boundary Condition **B. S. Yilbas**

CONTENTS Vol. 38, No. 5

443 A Numerical Investigation of the Convective Heat Transfer in Unsteady Laminar Flow Past a Single and Tandem Pair of Square Cylinders in a Channel **J. L. Rosales, A. Ortega and J. A. C. Humphrey**

467 Numerical Study of Multilayered Flow Regime in Double-Diffusive Convection in a Rotating Annulus with Lateral Heating **Jinho Lee, Shin Hyung Kang and Young Seok Son**

491 Application of Grooved Fins to Enhance Forced Convection to Transverse Flow **Sang-Jong Lee and Tae-Ho Song**

513 Numerical Modelling of Microscale Effects in Conduction for Different Thermal Boundary Conditions **G. Siva Prakash, S. Sreekanth Reddy, Sarit K. Das, T. Sundararajan and K. N. Seetharamu**

533 Winglet-Type Vortex Generators for Plate-Fin Heat Exchangers Using Triangular Fins **R. Vasudevan, V. Eswaran and G. Biswas**

CONTENTS Vol. 38, No. 6

557 A Computational and Experimental Investigation of Turbulent Jet and Crossflow Interaction **G. Chochua, W. Shyy, S. Thakur, A. Brankovic, J. Lienau, L. Porter and D. Lischinsky**

573 A Hybrid Finite Element–Finite Difference Method for Solving Three-Dimensional Heat Transport Equations in a Double-Layered Thin Film with Microscale Thickness **Weizhong Dai and Raja Nassar**

589 Three-Dimensional Analysis of the Walking-Beam-Type Slab Reheating Furnace in Hot Strip Mills **Jong Gyu Kim, Kang Y. Huh and Il Tae Kim**

611 Heat and Flow Evaluation in Rotating Circular Disks Passage with a CFD Approach **E. Y. K. Ng, Z. Y. Liu and C. Y. Soong**

627 Mixed Convection in a Rectangular Enclosure with Discrete Heat Sources **T. H. Hsu and S. G. Wang**

653 Integral Transform for Periodic Laminar Forced Convection in Simultaneously Developing Flow **S. Cheroto, J. S. Pérez Guerrero, C. A. C. Santos and A. Kakaç**

CONTENTS Vol. 38, No. 7

681 Analysis of Moving Boundary Problem for Bubble Collapse in Binary Solutions **J. Cao and R. N. Christensen**

701 Numerical Investigation of the Blade Cooling Effect Generated by Multiple Jets Issuing at an Angle into an Incompressible Horizontal Crossflow **Subrata Roy**

719 A Low-Dimensional Approach for Linear and Nonlinear Heat Conduction in Periodic Domains **Mizanur R. Siddique and Roger E. Khayat**

739 An Efficient Approach to Simulate Natural Convection in Arbitrarily Eccentric Annuli by Vorticity-Stream Function Formulation **C. Shu, Q. Yao, and K. S. Yeo**

757 A Fast Algorithm for Calculation of Radiative Energy Distributions Received by Pinhole Image-Formulation Process from 2D Rectangular Enclosures **Huai-Chun Zhou, Feng Sheng, Shu-Dong Han, and Chu-Guang Zheng**

CONTENTS Vol. 38, No. 8

775 Boundary Element Analysis of Viscous Channel Flow **M. Aydin and R. T. Fenner**

795 Unsteady Free Convection in a Vertical Channel with a Built-in Heated Square Cylinder **A. K. Saha**

819 Analysis of Laminar Forced Convection of Air for Crossflow in Banks of Staggered Tubes **Y. Q. Wang, L. A. Penner, and S. J. Ormiston**

847 Effects of Adaptivity on Finite Element Shemes for Turbulent Heat Transfer and Flow Predictions **É. Turgeon, D. Pelletier, and L. Ignat**

869 A Continuous Sensitivity Equation Approach to Optimal Design in Mixed Convection **É. Turgeon, D. Pelletier, and J. Borggaard**
